**DETAILED ACTION**

1. This action is in response to the amendment filed 6/10/2008.
2. Claims 1 and 3 are allowed.

***Examiner's Amendment***

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The amendment was necessary because that claim 2 is needed to incorporate into claim 1 for further clarify the isolating step. A telephone interview with Mr. Frantz on 7/17/2008 was made to seek an examiner's amendment. Authorization for this examiner's amendment was given in a telephone interview with Mr. Frantz (Reg. No 42,553) on 7/18/2008. Examiner's amendment is necessitated to further clarify the claimed invention.

Per applicants' request, claim 1 has been further amended below; claim 2 has been canceled.

1. (Currently Amended) A computer-implemented method for transferring content from one computer resource to another computer resource, comprising the steps of:

receiving a user command to enable automatic cutting-and-pasting in a destination first, source second sequence, with user enablement of automatic natural language translation;

subsequent to receiving said command and enablement, receiving a user selection of one or more insertion points in the contents of a destination computer resource via a destination user interface, said computer resource consisting of an electronic document;

subsequent to receiving said user-selected insertion points, receiving a user selection of one or more information elements via a source user interface; intercepting transfer of said information elements to said destination;

determining which intercepted information elements are expressed in a natural language not matching a user-specified natural language;

responsive to finding no existing natural language handling rule for an information element to be transferred:

invoking a rule management user interface; and

allowing via said rule management user interface a user to define an action to be taken selected from the list of invoking a natural language translation process, allowing transfer without modification, and isolating said information element according to said handling rules, thereby blocking their transfer to said destination;

performing one or more natural language handling actions on information said elements which do not match said user specified natural language as defined by one or more natural language handling rules; and

transferring any information elements to said destination which have been translated to said user specified natural language as a result of said handling actions.

2. (Cancelled)

***Examiner's Statement of Reason(s) for Allowance***

4. The following is an examiner's statement of reasons for allowance:

The prior art of records i.e. Miller et al ("Synchronizing Clipboards of Multiple Computers") and Seme (USPNA 2003/0125927), taken alone or in combination with other prior art fails to teach or reasonably suggest *responsive to finding no existing natural language handling rule for an information element to be transferred; invoking a rule management user interface; and allowing via said rule management user interface a user to define an action to be taken selected from the list of invoking a natural language translation process, allowing transfer without modification and isolating said information elements according to said handling rules thereby blocking their transfer to said destination* as recited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
